"Pragmatic front-end developer and wannabe designer focused on delivering what users want. Strongly believing in cross-department collaborations and fast prototype validation. I like iterating on concepts with end users so that all involved parties are aligned towards common goal."

Work experience

Snapshot GmbH (July 2016 – February 2018)

Development of cloud-based instant messaging progressive web app called Fabric for users within hospitality industry.
Reference Radek Matěj

Adacta Group (June 2015 – June 2016)

Part of development team as a full-stack developer. Working on product called AdInsure that serves employees in insurance companies in several European countries.
Reference Benjamin Levstek

FNZ Czechia (July 2013 – March 2015)

Development of internal test automation framework with its connected web client and dashboard used for managing and configuring test runs, results and or data.
Reference Ondřej Homola

Přístupnější stát (Accessible state in translation) (2015 – 2017)

Member of small NGO whose main aim was to help cities and small government organizations to improve their digital and or physical services for their consumers.
Reference Tomáš Arnot
